

FiberPrep

Seal • Strengthen • Protect

The Problem

What Are You Facing?

Common Issues with Roofing & Surface Damage

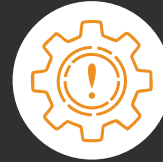

Cracked Roof Tiles & Openings

Over time, roof tiles, edges, and grout lines develop cracks that compromise the integrity of the structure.

Water Leaks & Moisture Damage

Gaps in roofing surfaces allow water ingress, leading to leaks, mold growth, and structural weakening.

Rigid, Brittle Repairs That Shrink Over Time

Some fillers shrink after curing, causing repairs to fail and requiring frequent maintenance.

Costly Tile Replacement & Repairs

Removing and replacing cracked roof tiles is expensive and labor-intensive, making it an impractical solution for minor damages.

The Solution

How FiberPrep™ Can Help

FiberPrep™ is a high performance liquid rubber preparation reinforced with cellulose fibers. Expertly formulated to seal cracked roof tiles, edges, and other openings that may compromise the integrity of the substrate. Designed to strengthen and protect for maximum durability and improved abrasion resistance between the substrate and the waterproofing coat system.

FiberPrep™ forms a flexible yet robust barrier that effectively prevents the ingress of moisture, protecting your surfaces from damage and ensuring professional-grade results.

Premium
Formulation

Penetrates & Prepares
Surfaces for Topcoats

Excellent Adhesion
Quick Drying

Enhanced Waterproofing
and Top-coat durability

Benefits of Using FiberPrep™

Multipurpose Applications

Superior Crack Sealing with Cellulose Fibers

Provides reinforced sealing power, filling deep cracks and preventing further damage.

quick drying

non-toxic

water based

enviro friendly

with mould
inhibitor

Flexible Yet Durable

Expands and contracts with temperature changes, preventing cracks and splits while maintaining strong adhesion.

Waterproof & Weather-Resistant Protection

Forms a robust, watertight barrier that prevents leaks and moisture penetration.

Cost-Effective & Eco-Friendly Solution

Non-toxic, low-VOC formula that offers long-lasting repairs at a fraction of the cost of tile replacement.

RubberTech
EXPERT FORMULATIONS

RubberTech™ boasts an array of highly adhesive and expertly formulated Liquid Rubber Paint™ and other roof repair and waterproofing products.

AlgenTech XE Protect™ Advanced Sterilizing Solution

AlgenTech™ a powerful cleaning and sterilizing solution that protects surfaces from pollutants and bio-organisms. AlgenTech™ XE Protect is added to RubberTech™ Liquid Rubber Paint™ to prevent microbial, fungus, and algae growth, enhancing waterproofing longevity.

ClearPrep™

ClearPrep is an elastomeric acrylic resin emulsion that protects, seals, and waterproofs roofing structures by creating a seamless, flexible, and durable membrane resistant to environmental elements.

AsbestoSeal™ Advanced Asbestos Encapsulator

AsbestoSeal™ a specialized encapsulation solution that safely binds and seals asbestos-containing materials (ACMs) and weathered fiber cement to prevent hazardous fiber release. It also inhibits bacterial growth, extends material lifespan, and eliminates the need for costly asbestos removal.

FiberPrep™

FiberPrep™ is a high performance liquid rubber preparation reinforced with cellulose fibers. Expertly formulated to seal cracked roof tiles, edges, and other openings that may compromise the integrity of the substrate.

RubberTech™ High Performance Bonding Primer

RubberTech™ Bonding Primer, a premium primer designed for superior adhesion on roofing substrates, ensuring durability and a strong foundation for watertight and weather-resistant coatings.

RubberTech™ Hyper Premium Waterproofing Liquid Rubber Paint™

RubberTech™ Liquid Rubber Paint™ – New generation water based acrylic elastic long life Water Proofing coating for use with and without a premium membrane for sealing roofs from water penetration.

Liquid Rubber Paint™ with Rost Guard™

New Generation Liquid Rubber Paint™ with added Rust Prevention is specifically formulated for metal roofs. This unique corrosion-inhibiting formula ensures excellent adhesion to metal surfaces while forming a seamless, flexible, and durable waterproofing membrane. Engineered for long-lasting protection, it prevents water penetration, and shields metal surfaces from rust and degradation. It's the ultimate solution for dependable protection.

Thermo Liquid Rubber Paint™ with RostGuard™

Our Heat-Reflective, Liquid Rubber Paint™ with Rust Prevention is a new generation cool roof technology of high-performance coatings designed to provide comprehensive protection for metal and slate roofs in both residential and commercial applications. Engineered with cutting-edge waterproofing, heat-reflective, and anti-corrosion technology, this solution extends the lifespan of roofing surfaces by preventing water infiltration, reducing heat absorption, and inhibiting rust formation on metal substrates.

RostTech™

RostTech™ Rust is a water-based rust converter with a polymer primer that deeply penetrates rust, converting it into a stable compound that can be over-coated without stripping it back to bare metal.

ThermoTech™ Cool Roof Technology Waterproofing

Next generation ThermoTech™ Titanium liquid rubber paint effectively reflects up to 85% of UV & infrared solar radiation and convects heat instead of transferring it into the building. Thermo Tech™ Cool Roof Technology substantially contributes to a building's process efficiency, comfort and has benefits of saving on energy and running costs.

RostGuard™ Advanced Rust Inhibitor

RostGuard™ is a cutting-edge rust prevention solution designed to protect metal surfaces from corrosion. Innovative, eco-friendly formula halts corrosion while preparing the surface for over-coating, eliminating the need for abrasive rust removal when used with RostTech™ water-based rust converter.
